PROJECTS

- ❖ **Online Election Management System (Group Project - group of 3)**
 - The platform enables administrators to launch and manage elections seamlessly. This includes defining election timelines, setting up voting procedures, and monitoring the entire election process
 - The user has no need to travel a lot to vote, as they can vote from any city. They just have to go to any voting booth and they can give their vote from there irrespective of their constituency.
 - Technology: Java Spring Boot, React, MongoDB
- ❖ **CollegeBuzz - College Social Network Website (Individual)**
 - Users can create and share articles, post relevant news updates, and staff members can announce upcoming events. All content undergoes approval by the administrator, ensuring a reliable and trustworthy information source.
 - Technology: C#, .NET Core and React
